**Cornus kousa** - Kousa Dogwood  
Kousa dogwoods are lovely small specimen trees found in Harper Quad flanking the doors to Stuart and Haskell Halls. Creamy white bracts, that appear to float above the foliage, are the showy part of the inflorescence appearing in mid June. Dark green summer foliage turns reddish purple or scarlet in autumn.

---

**Sorbaria sorbifolia 'Sem'** - Sem Ural False Spirea  
One of the first deciduous shrubs to leaf out in spring, Sorbaria 'Sem' glows with orange, red, and yellow hues. Sorbaria can be found in the following gardens: Palvesky Residential Commons - northeast corner and in the Main Quad on the west side of Rosenwald.

---

**Paeonia 'Sarah Bernhardt'** - Sarah Bernhardt Peony  
Peonies are considered by some to be the queen of the herbaceous perennial border. Attractive, lobed foliage will turn shades of purple, yellow Peonies perform best in full sun with well drained soil. Found throughout the lush Kramer Beds flanking the Main Quad path east of Levi Hall.

---

**Mandevilla x 'Sunmandecrim'** - Crimson Giant Mandevilla  
Mandevilla is a vigorous vining annual with dark green foliage and intense crimson-red trumpet shaped flowers. This non-stop blooming vine is the centerpiece of many Main Quad planters.
